Skills

Languages: Java, JavaScript, Bash/Shell (Scripting)

Cloud & DevOps: Docker, AWS (EC2, S3), CI/CD Pipelines, GitHub Actions, Linux, Git, GitHub

Concepts: Containerization, Deployment Automation, Infrastructure Management, Networking Fundamentals

Backend: Node.js, Express.js, REST APIs, MongoDB, MySQL

Other Tools: Supabase, Cloudflare R2, OAuth 2.0, Hugging Face Models

Education

Pimpri Chinchwad College of Engineering and Research

B.E. in Computer Engineering

2023–present

CGPA: 8.35

Maharashtra State Board

Higher Secondary Education (HSC)

2021–2023

Score: 81.83% — MHT-CET: 98.31

Experience

Full Stack Web Developer Intern – UD Studios

Dec 2025 – Feb 2026

item Built a full-stack Room Booking platform with RBAC and 3 role-based dashboards (Guest, Host, Admin), handling 100+ user interactions with secure permission management and clean system design.

- Engineered backend logic to handle concurrent booking requests, mitigating race conditions and ensuring data consistency, while implementing secure access control and validation to enhance system reliability.
- Containerized the application using Docker and managed deployment on a cloud server, configuring environment variables, access control policies, and storage integration with Cloudflare R2 for a production-ready setup.

Projects

Finarrator – AI Powered Financial Assistant

[\[GitHub\]](#)

Tech Stack: React.js, Node.js, Express.js, Firebase, OAuth 2.0, Fi's MCP Server, Hugging Face Models

- Built an AI-powered financial assistant using LLMs, generating real-time financial insights across 5+ financial scenarios and delivering personalized responses with 2 second latency.
- Designed and implemented a financial performance dashboard, RAG-based chatbot, improving data accuracy and response relevance.
- Engineered structured prompts that combine user intent, financial data, and contextual information to generate accurate and reliable LLM responses.

Report.ai - NLP Powered Feedback Analytics Platform

[\[GitHub\]](#)

Tech Stack: React.js, Django, MySQL, Hugging Face Models

- Built a feedback analytics platform using NLP pipelines to process 10K+ evaluation records, enabling efficient performance review analysis.
- Designed data-driven and adaptive feedback form, that improved user engagement and response rates.
- Implemented keyword and trend detection modules to analyze thousands of feedback responses, reducing manual analysis effort.

Leadership

Web Team Lead – ACMxPCCOER

2025 – Present

- Enhanced and maintained a responsive, user-friendly website, ensuring seamless UI across devices.
- Optimized frontend performance and asset loading, reducing page load time by 40%.
- Led a 5-member frontend team, delivering milestones on schedule.

Achievements

- Completed AWS certifications including Cloud Practitioner Essentials, Technical Essentials, Getting Started with DevOps on AWS.
- Solved 400+ Data Structures and Algorithms problems on LeetCode.
- Top 10 - Finance Track, Google Agentic AI Hackathon 2025 ,Winner - Two College-level Project Competitions
